

Homestuck God Tiers

By S. Ann Ran

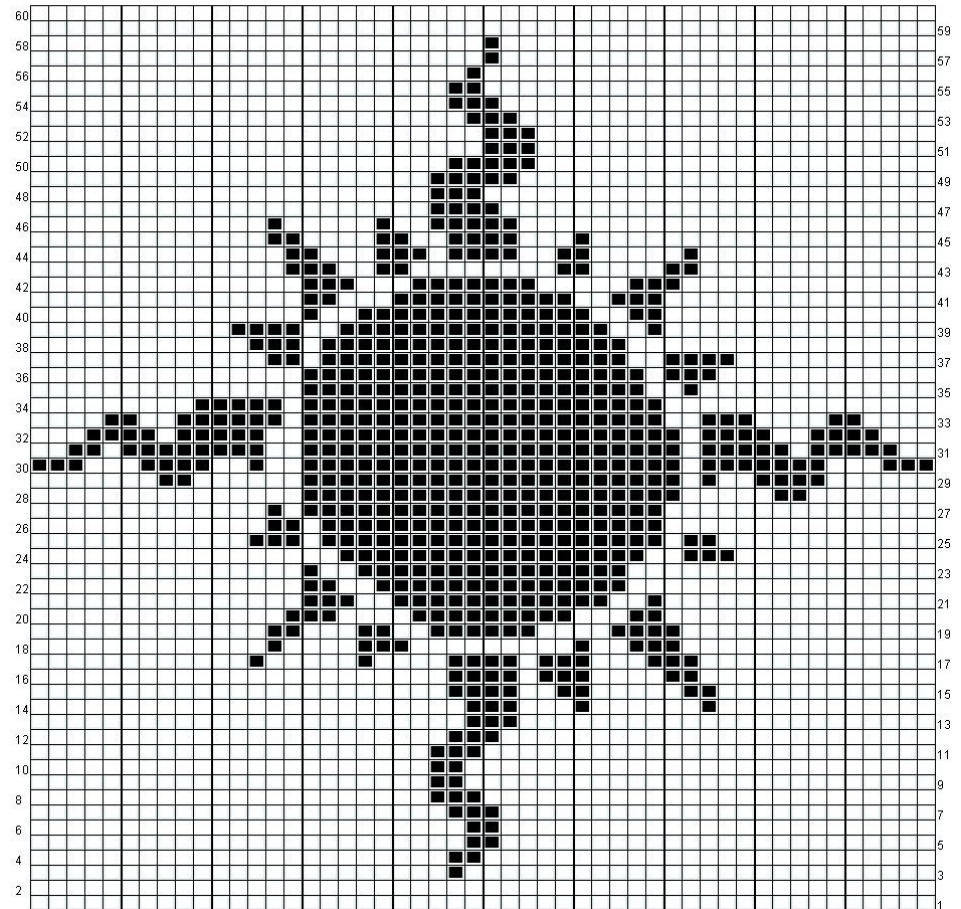

4 in x 4 in gauge: 20 sts by 24 rows on #9s

The twelve God Tiers as created by Andrew Hussie for Homestuck; charted to the same scale as the previous zodiac signs. All charts are 50 sts by 60 rows and the image is centered on that chart; the idea was that all the charts would be needed, and to have them in relation to each other. The majority of the images used to create the charts came from the Homestuck Wiki; the rest came from Homestuck Resources (<http://homestuckresources.tumblr.com/>).

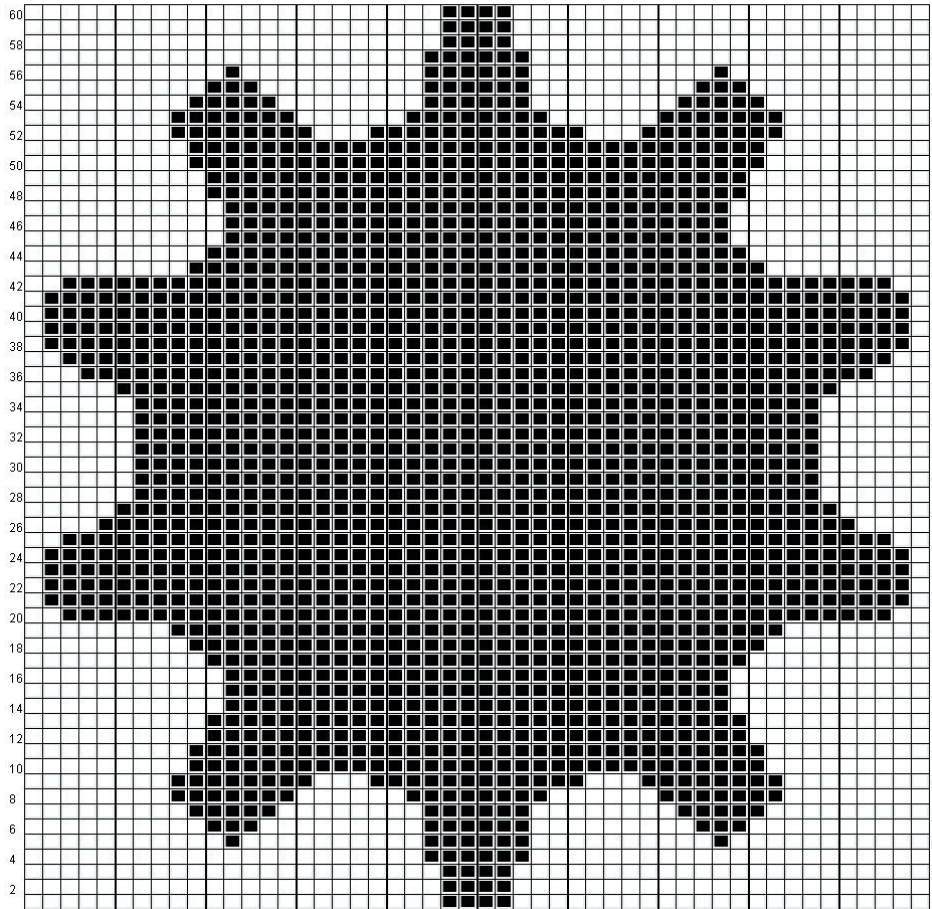

Breath

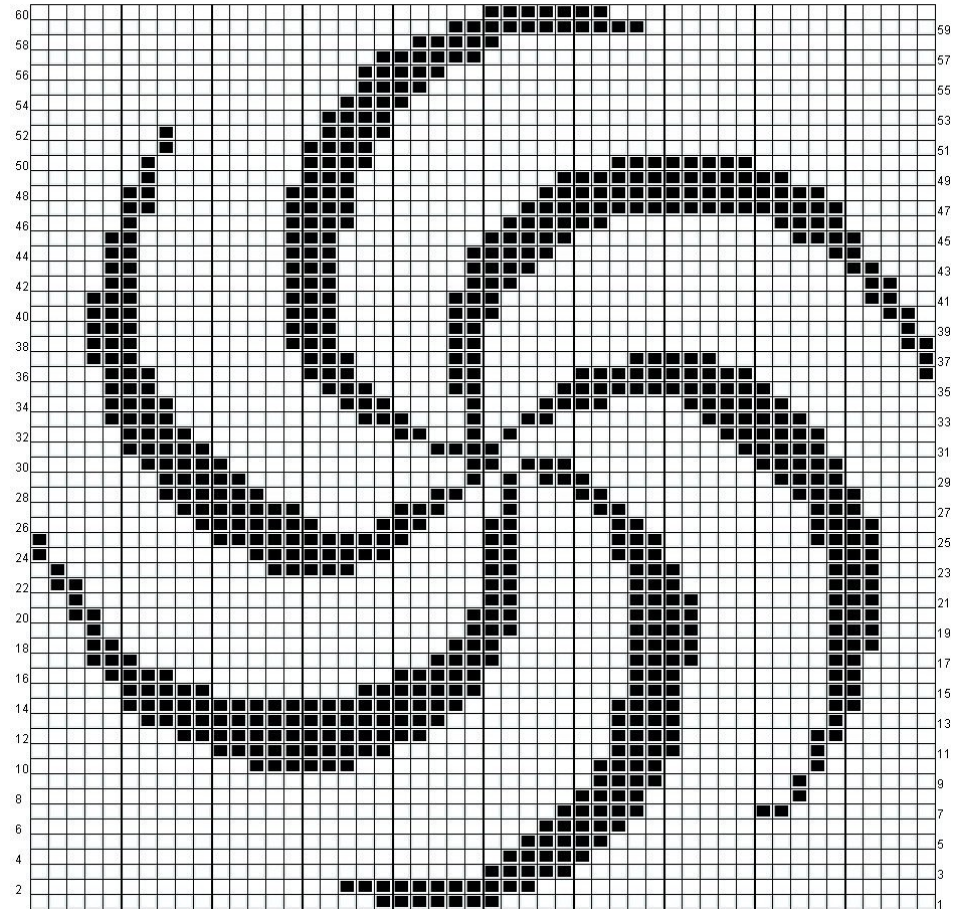

Light

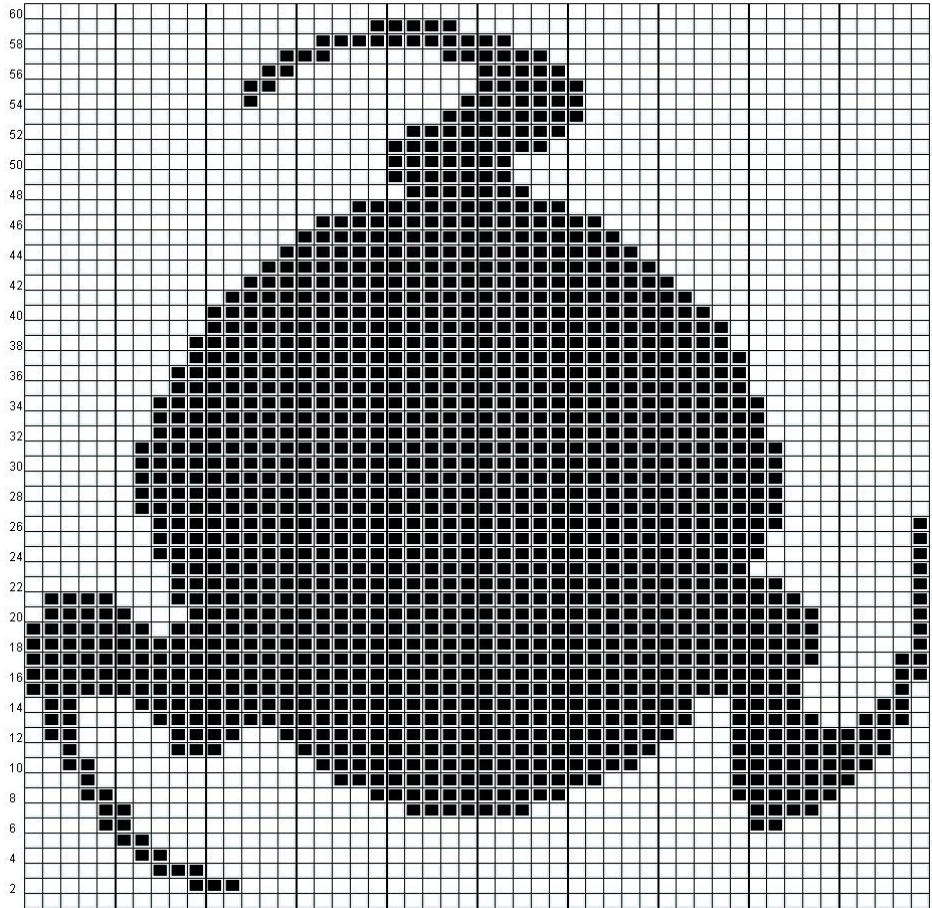

Time

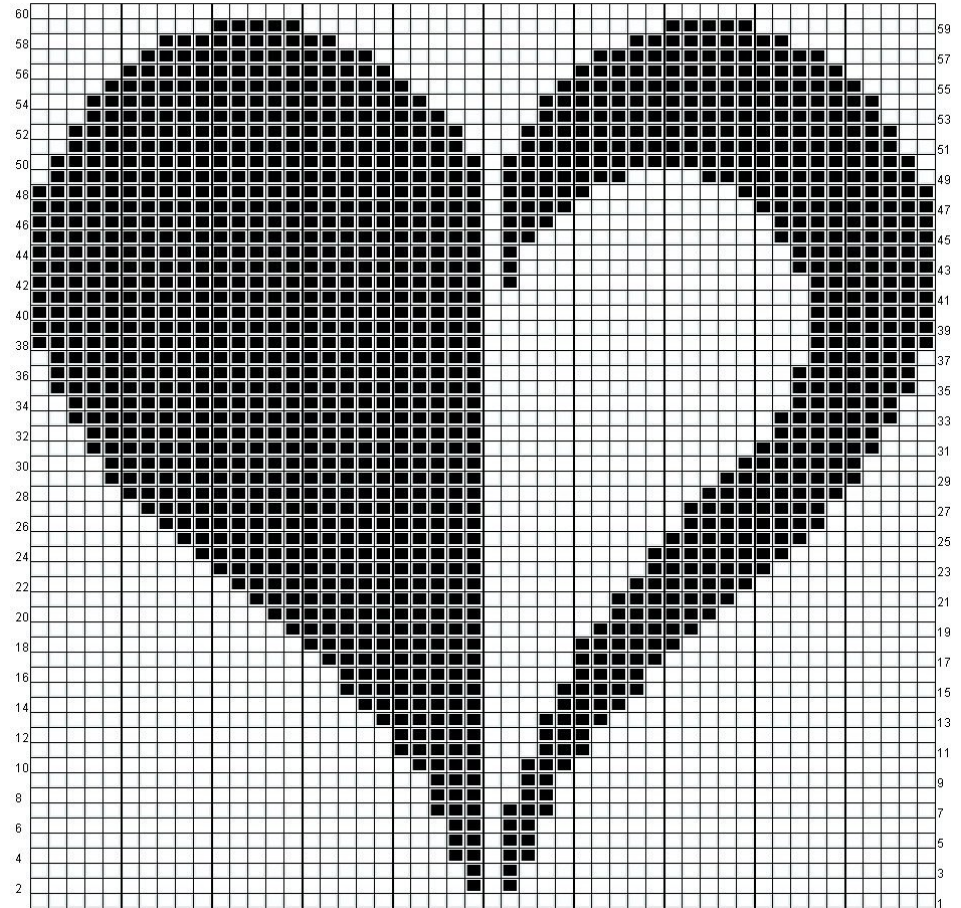

Space

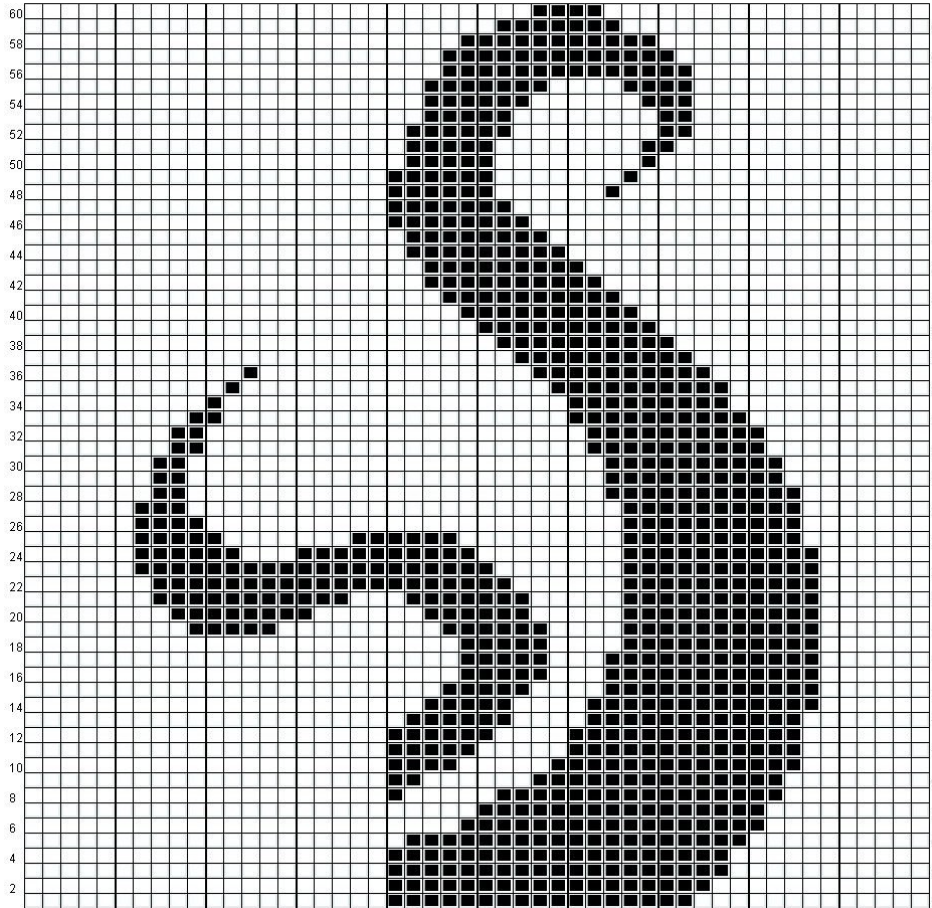

Mind

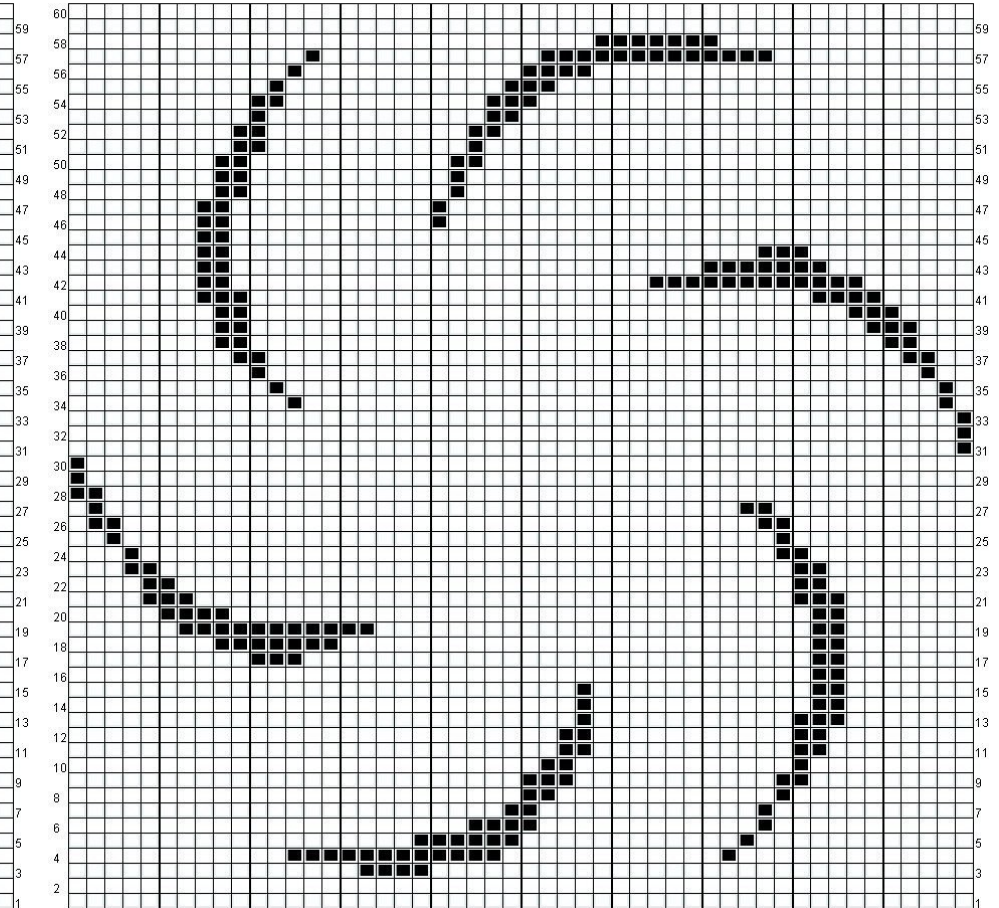

Heart

Life

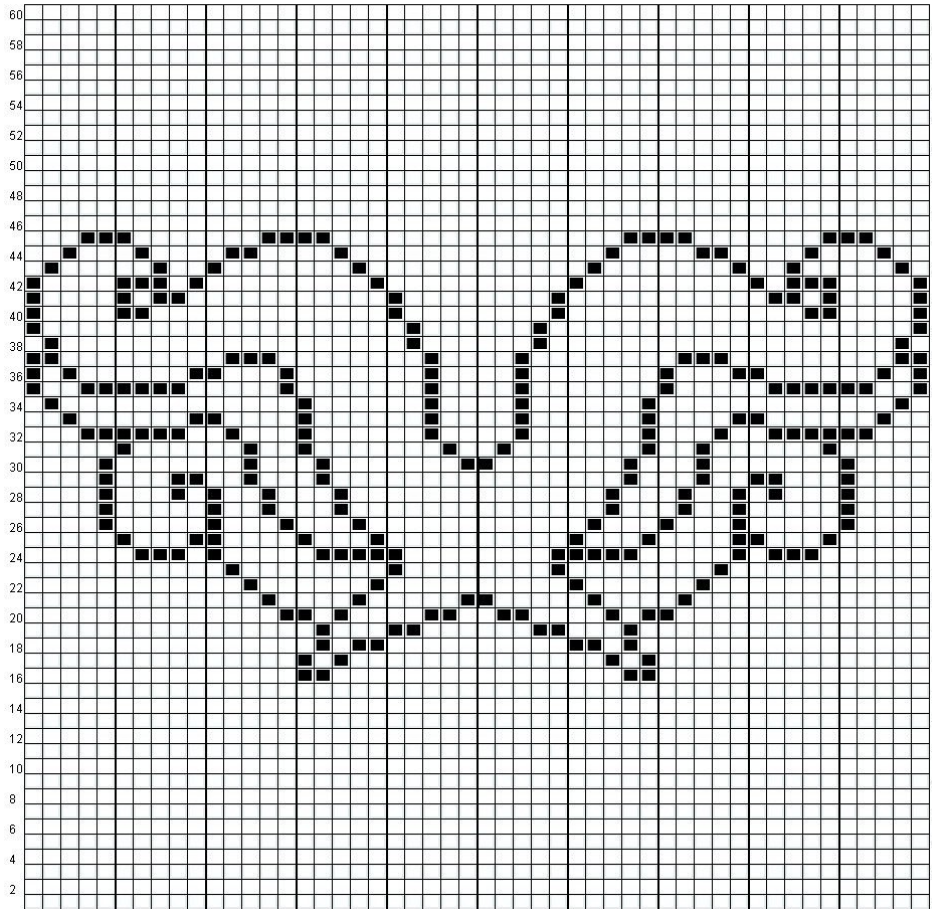

Void

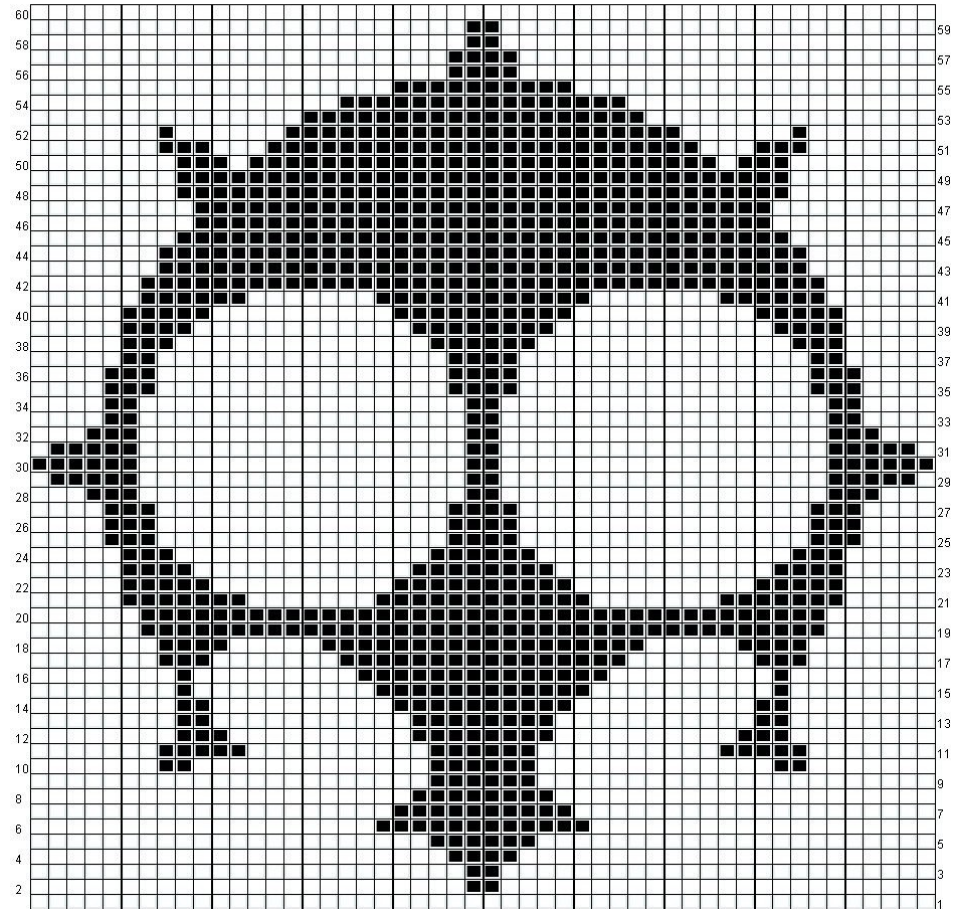

Note: regarding Hope, I charted the lines surrounding it rather than majority of it like the rest – the version I worked from was like that, and I simply preferred that version. My own plan is to do the outline in a darker gold than the inside; just doing the inside of the lines in a contrasting color from the rest of the block should be the same as what appears on Hussie's hoodies/tees.

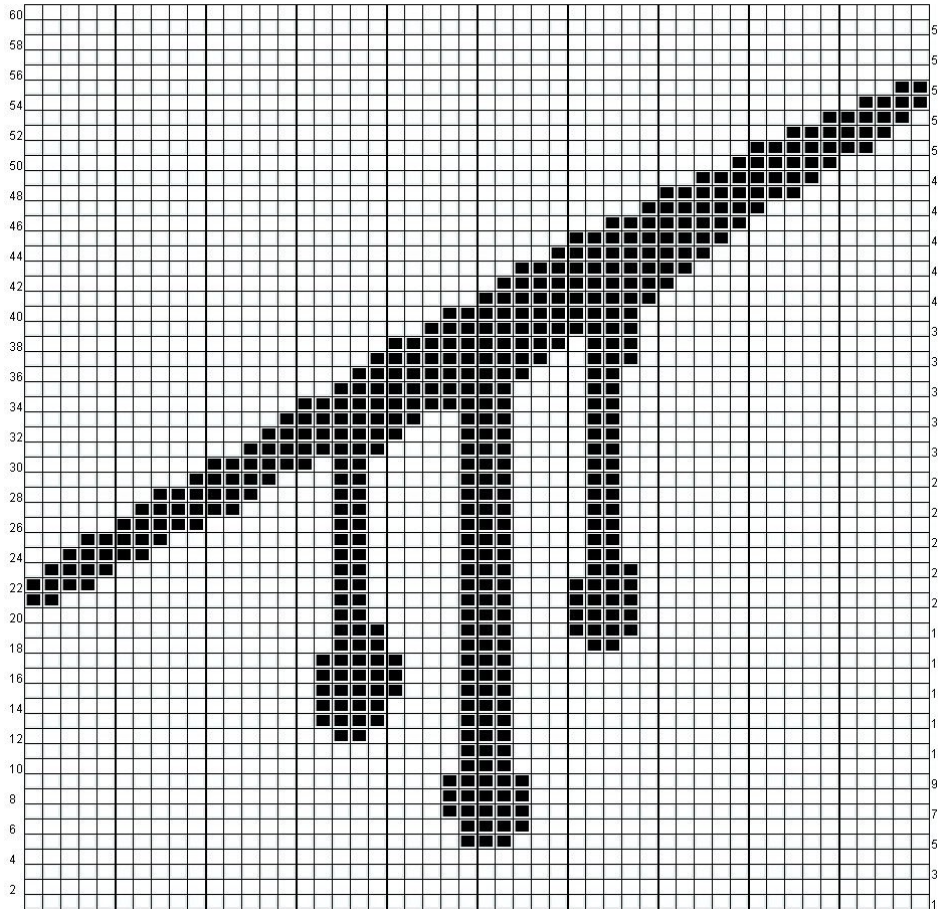

Hope

Doom

Blood

Rage
